# PROGRAM SPONSORSHIP

## Help support our mission by sponsoring a Keystone Science School program!

We invite your company to support our Outdoor Education programs! By sponsoring these initiatives, you not only promote your business but also help us further our mission. Your partnership will provide transformative experiences for young minds, inspiring their curiosity in science and the natural world. Aligning with these programs will enhance your brand's visibility and contribute to our community's growth, all while fostering the next generation of leaders and environmental stewards.

## SPONSORSHIP LEVELS

### PLATINUM \$10,000

*All Gold & Silver Benefits, plus:*

- Top-tier logo placement on all program specific signage, digital and print communications and website placement

### GOLD \$5,000

*All Silver Benefits, plus:*

- Social Media Recognition
- 1-Day Meeting Space Rental
- Middle-tier logo placement on all program specific signage, digital and print communications and website placement

### SILVER \$1,000

# PROGRAM SPONSORSHIP OPPORTUNITIES

## Outdoor Education for Schools

### School Year

KSS is proud to provide schools with unique overnight field trips that combine Science, Adventure, and Fun! Each environmental education field trip is tailored to the learning goals of each participating school. Located in a high mountain environment outside Denver, our classroom is the forest, streams, and alpine tundra where students can be outside and adventuring.

## H2O Outdoors

### Fall 2024

H2O Outdoors is a 3-day program teaching high school students about the many uses of water and the policy of how Colorado's water is managed. Students learn about careers within water management, conduct field-based research, and visit several key locations in Summit County, Colorado as they learn about the various stakeholders who work to manage our water.

## Beyond the Classroom

### Fall 2024

Beyond the Classroom is a 3-day professional development workshop for 4th-12th grade teachers and informal educators. Teachers receive curriculum and training to explore science topics and issues using KSS's non-biased framework, along with a complete set of lesson plans to facilitate an issues-based curriculum in their classroom.

## Girls in STEM

We believe in empowering girls by engaging them in hands-on, real-world activities to show STEM is relevant and fun in an ever-changing world. Female STEM professionals volunteer to mentor, support and inspire the students to further their STEM interests and studies and share their successes and challenges in navigating a male-dominated industry.

### 4 Girls in STEM programs in 2024

#### Snow Science

Feb. 9-11, 2024

#### Medical Explorers

April 19-21, 2024

#### Film Fest

Sept. 2024

#### Water in the West

Oct. 2024
